

# System-optimizer

## Sybit and your week is purple!

At Sybit, your daily work is not always the same, we are direct and don't promise you everything you want to hear. Our passion is customer experience. With our SAP Commerce Experience Solutions, we are creating new digital experiences, people are talking about and inspire our customers. We love challenging projects. Is that what you want too? No buzzword bingo, but challenging and always on the pulse of time. We are curious about you! Come and join our team!

## Software Developer Java/Spring (all genders)

Site: Radolfzell / Offenbach / Hannover / Bielefeld / Home-Office (Germany)

### Your tasks

- Within our interdisciplinary scrum team, you design and develop web applications based on JEE, Tomcat and Spring.
- You integrate software modules using Java and Spring and program interfaces to backend systems.
- Among other things, you integrate our web shop solutions into the existing infrastructure of our customers.
- You analyse customer requirements, design proper solutions and implement them in dialogue with our customers.
- You are jointly responsible for architecture decisions, the delivery of the software as well as for the compliance of quality standards

### Your talent

- You have several years of experience of designing and implementing of complex software systems
- Your deep understanding in software architecture and software design will help you to find the best solution
- You are very familiar with JEE web technologies, ideally you have experience in the e-commerce environment.
- You are open to new technology and future trends such as Industry 4.0, IoT and VR
